

Position Title: Network and Systems Engineer II

Date Posted: 4/11/08 Education: Technical BS or
Equivalent
Location: Cleveland, Ohio Type: Full-Time
Experience: 7 Years

Summary

The Network Engineer's role is to ensure the stability and integrity of in-house voice, data, video and wireless network services. This is achieved by planning, designing, installing, configuring, maintaining, supporting, and optimizing all network hardware, software, and communication links and developing local area networks (LANs) and wide area networks (WANs) across the organization. In addition, the Network Engineer will participate with the installation, monitoring, maintenance, support, and optimization of all network hardware, software, and communication links. This individual will also analyze and resolve network hardware and software problems in a timely and accurate fashion, and provide end user training where required.

Experience/Skills Desired:

Technical:

Experience with Windows Servers, Exchange, SharePoint and Active Directory

- Experience with VMware, Citrix and Linux
- Good Understanding of Microsoft Windows OS networked technology
- Understanding and familiarity with IT policies and procedures
